Cats Vs Dogs

Week 1Exercise

Exercise

Dogs versus Cats who does America love most?

The goal of this exercise is to explore US census data taken in 2012 to get a feeling of the love of dogs or cats across America. This subset of the data looks at number of households per state which have pets and especially in relation to cat owners and dog owners. There is no data, included in this dataset which considers households which have both cats and dog.

Note, all data is x1000 (e.g. a value of 1000 is really $1000 \times 1000 = 1,000,000$.)

Exercise: Loading the data

- **Open Households.xlsx and clean it**
- **Click 'Add' and add the Dogs.xlsx data, clean and join it**
 - The 'Add' link is just to the right of 'Connections' and allows you to add new files to your composite data source
 - We want to compare based on state so make sure you resolve the joining correctly.
- **Click 'Add' and add the Cats.xlsx data, clean and join it**
 - Are you sure you have both joined correctly? We want to compare cats and dogs based on a national basis.
- While I'm not 100% sure, I'm 99% confident that if you are linking to any data sheet that needs a 'Clean with the Data Interpreter' that when you join a new sheet to it you have to select that check box for each new join to that sheet as well.

Exercise: Result of Loading the data

Go to Worksheet

Data Source Sheet 1

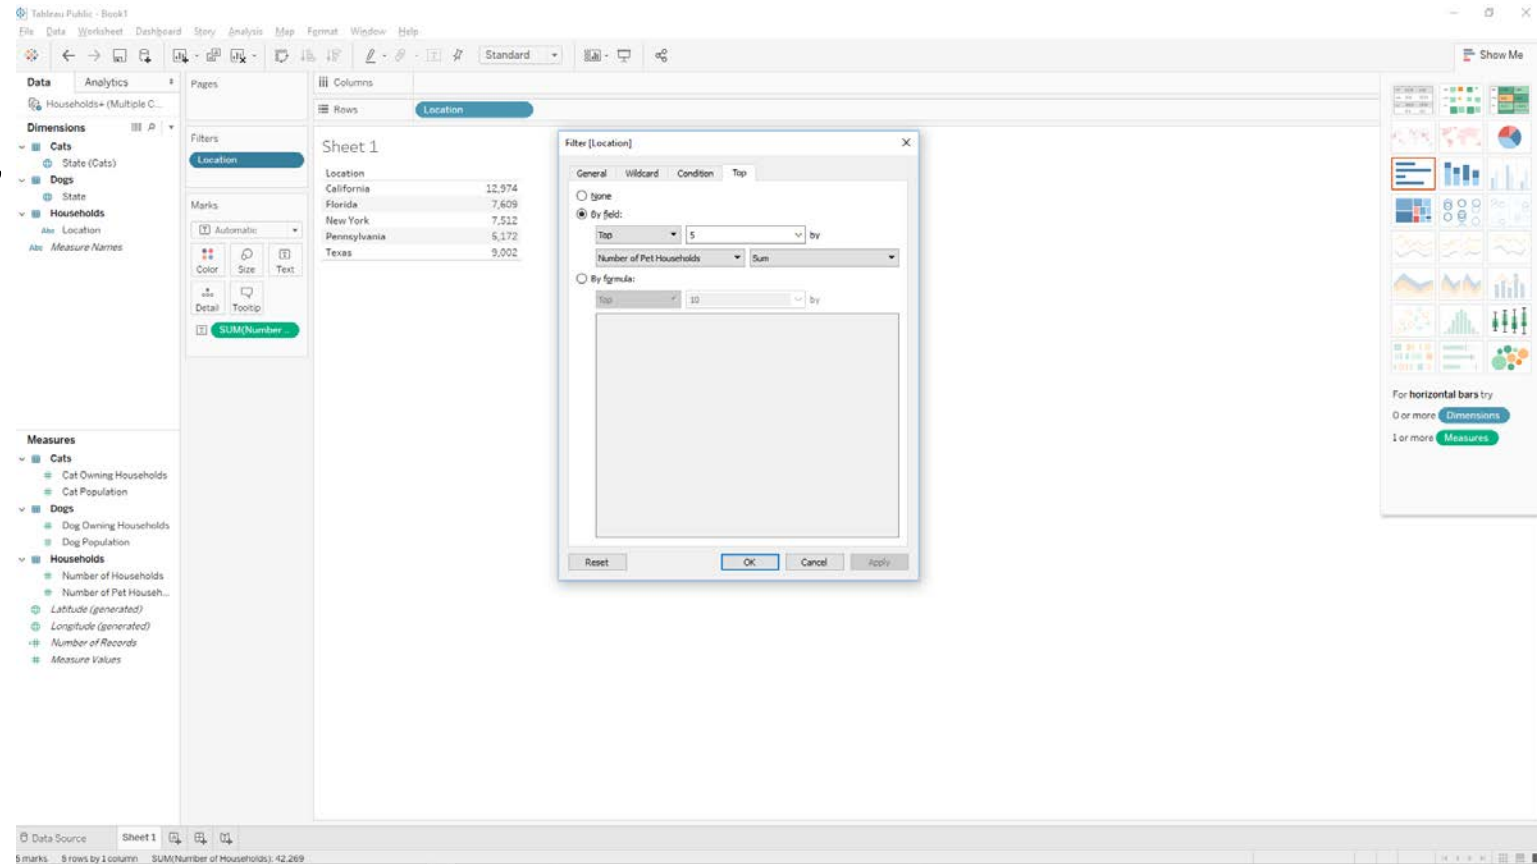

Exercise: First simple visualization – A text table

- Create a new Worksheet and create a 'Text Table' visualization of 'Number of Pet Households' per 'Location'
- Rename the Worksheet (right click on the 'Sheet 1' tab and select 'Rename') to 'Top/Bottom Pet Households'

Exercise: The 'Top' 5 pet owning states

- Create a 'Top' filter to find the 5 states with the highest 'Number of Pet Households'
 - Click and drag the 'Location' for Households (under Dimensions) to the 'Filters' shelf
 - If the Filter dialog box is not open just double click on your new 'Location' filter.
- Select the 'Top' tab
- Select 'By Field'
- Select 'Top', change 10 to 5,
- select 'Number of Pet Households'
- Click 'Apply'

Exercise: The 'Bottom' 5 pet owning states

- Create a 'Bottom' filter to find the 5 states with the lowest 'Number of Pet Households'
 - Change 'Top' to 'Bottom' and click 'Apply'
 - If the Filter dialog box is not open just double click on your new 'Location' filter.

Exercise: New data 'Percentage of Pet Households'

- Create a new Worksheet and Rename it to 'Percentage of Pet Household'
- Create a new 'Calculated Field' (click 'Analysis'-> 'Create Calculated Field')
- Name it 'Percentage of Pet Households'
- Add a new expression as: $[\text{Number of Pet Households}]/[\text{Number of Households}]*100$
- Click 'Apply'

The screenshot shows the Tableau Public interface with a worksheet titled 'Percentage of Pet Household'. The 'Columns' shelf is empty, and the 'Rows' shelf contains 'Location'. The 'Marks' shelf is set to 'Automatic'. The 'Dimensions' pane on the left shows 'Cats', 'Dogs', and 'Households' with their respective fields. The 'Measures' pane is empty. A dialog box titled 'Percentage of Pet Households' is open, showing the calculated field expression: $[\text{Number of Pet Households}]/[\text{Number of Households}]*100$. The dialog also indicates 'The calculation is valid.' and 'Sheets Affected'.

Location	Percentage of Pet Household
Alabama	59.52
Arizona	59.52
Arkansas	62.37
California	52.91
Colorado	61.28
Connecticut	54.45
Delaware	56.59
District of Columbia	21.95
Florida	54.38
Georgia	55.11
Idaho	61.97
Illinois	51.77
Indiana	59.89
Iowa	53.65
Kansas	60.99
Kentucky	61.56
Louisiana	55.05

Exercise: New data – ‘Percentage of Pet Households’

- Create a filter for ‘Percentage of Pet Households’
- Just click next when the ‘Filter Field’ dialog box opens
- Select ‘At Most’ and change the value to ‘50’
- Click ‘Apply’
- Create a filter for ‘Percentage of Pet Households’ < 50%
- If you want to see ‘Percent of Pet Households’ > 50% click ‘At Least’

The screenshot displays the Tableau Public interface with a worksheet titled 'Percentage of Pet Household'. The 'Columns' shelf contains 'Location' and the 'Rows' shelf contains 'SUM(Percentage of Pet Households)'. A 'Filter Field' dialog box is open, showing the 'At most' tab selected. The dialog box allows setting a filter on the 'Percentage of Pet Households' field. The 'Range of values' is set from 21.951219512 to 70.943396226, with a slider and a text input field set to 50. The 'Show:' dropdown is set to 'Only Relevant Values' and the 'Include Null Values' checkbox is unchecked. The 'OK' button is highlighted.

Exercise: Dogs versus Cats who does America love most?

- Create a new Sheet and rename it to 'Cats vs Dogs'
- Create a new Calculated Field and name it 'MoreDogs'
- Create the expression as;

*STR(if [Dog Owning Households] > [Cat Owning Households] then "Dogs"
elseif [Dog Owning Households] = [Cat Owning Households] then "Both"
else "Cats"
end)*

MoreDogs

```
STR(if [Dog Owning Households] > [Cat Owning Households] then "Dogs"  
elseif [Dog Owning Households] = [Cat Owning Households] then "Both"  
else "Cats"  
end)
```

The calculation is valid.

IF <expr> THEN <then> [ELSEIF
<expr2> THEN <then2> ...]
[ELSE <else>] END

Tests a series of expressions
returning the <then> value for
the first true <expr>.

Example: IF [Profit] > 0 THEN
'Profitable' ELSEIF [Profit] =
0 THEN 'Breakeven' ELSE 'Loss'
END

Exercise: Dogs versus Cats who does America love most?

- Double click 'Location' under Households
- Color by 'MoreDogs' and change the Marks dropdown from 'Automatic' to 'Map'

Time Series, Area Plots Plot Formatting and More Mapping

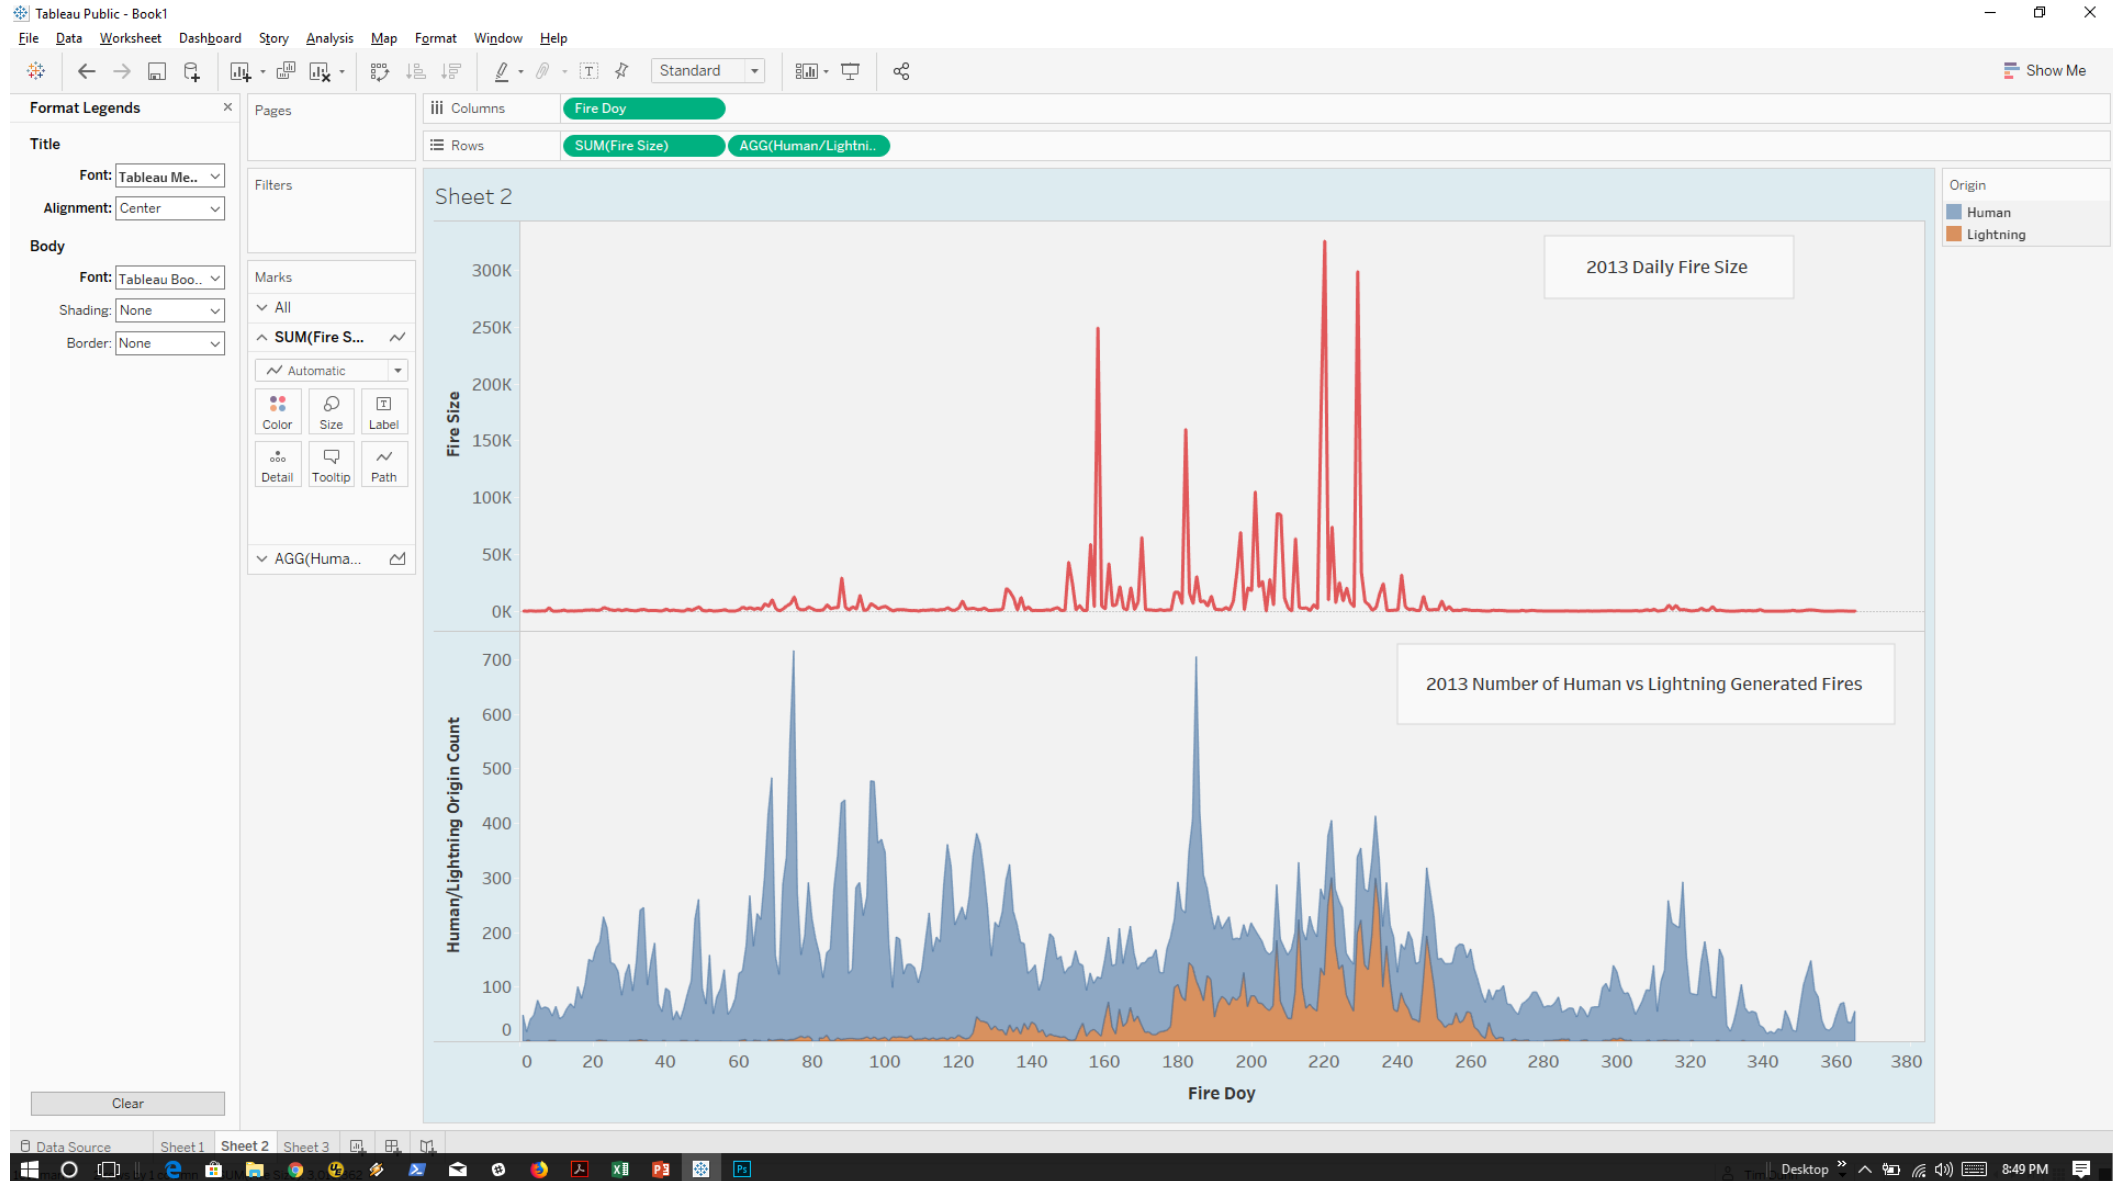

Fires Human vs Lightning - Timeseries

- **Clear your Tableau workspace**
- **On the 'Data Source' tab click on Excel**
- **Load the 'Fires.xlsx' file**
- **Create a new worksheet**
- **Drag 'Fire Day' to Columns and 'Fire Size' to Rows**
- **Right click the 'Fire Day' in your Columns and change it to Dimension.**

Fires Human vs Lightning – Adding a second Area Plot

- Duplicate your Timeseries plot
 - Create a new Calculated Field named 'Human/Lightning Origin Count' with the expression; *COUNT([Origin])*
 - Drag the new field to Rows and drop it to the right of SUM(Fire Size)
 - Make sure you have the new Field selected and in the Marks tab change the drop down box to select 'Area'
 - Color by 'Origin'
-
- TIPS ON FORMATTING PLOTS
 - Adding Annotations

Fires Human vs Lightning – Cluster Mapping

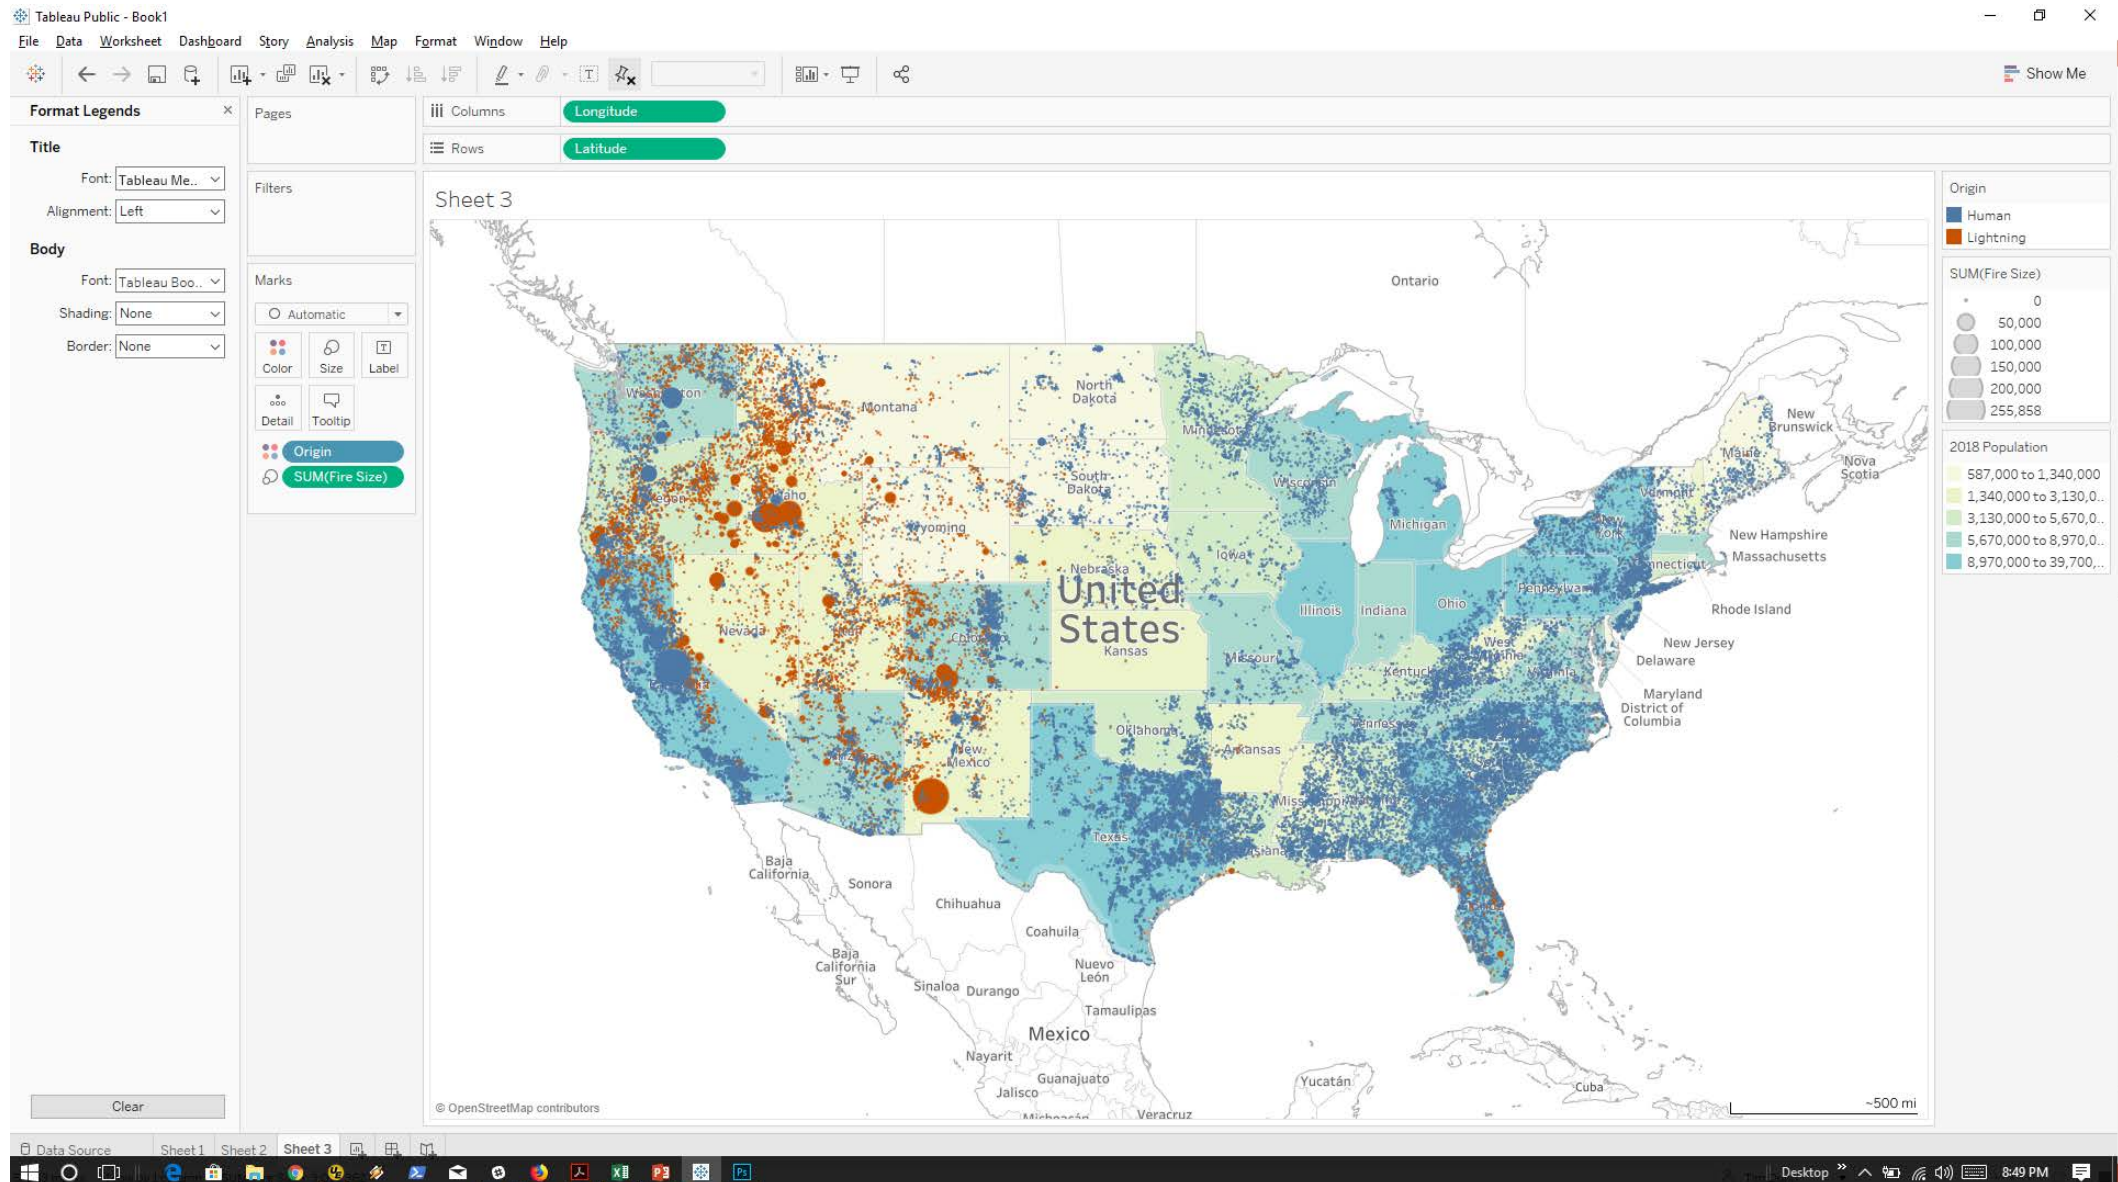

Fires Human vs Lightning – Cluster Mapping

- **Create a new worksheet**
- **Double click on 'Latitude' then double click on 'Longitude'**
- **Right click on 'Longitude' in the Columns shelf and change it to Dimension**
- **Right click on 'Latitude' in the Rows shelf and change it to Dimension**
- **Reset the Map if needed to see the whole US**
- **Color by 'Origin'**
- **Size by 'Fire Size'**

- **TIPS ON FORMATTING MAPS**

Fires Human vs Lightning – Cluster Mapping

Spatial Files

Using Spatial files

- Clear your Tableau workspace
 - On the 'Data Source' tab click on 'Spatial file'
 - Navigate to the na-cec_eco_l1 directory and select 'NA_CEC_Eco_Level1.shp'
 - Create a new worksheet
 - Double click on 'Geometry' under Measures
 - Color with 'NA L1Name'
-
- **TIPS ON FORMATING MAPS**

Accessing WMS files for new backgrounds

Web Services

- https://www.gebco.net/data_and_products/gebco_web_services/web_map_service/
- **Scroll down to Accessing the WMS and copy the link for 'For the global map'**
- **Select Map->Background Maps->Map Services**
- **Click 'Add' and select WMS Services**
- **Paste the URL into the 'URL' path edit box and then click 'OK'**
- **It will take a couple of seconds for the map to display**

Creating Dashboards

Sheet 1 – Bar Plot

- Load and connect to US_Obesity.xlsx Excel
- Create a new Sheet and rename it as 'Obesity Rate 2012-2013 by State'
- Add 'Measure Values' to Rows
- Add "State' and 'Measure Names' to Columns
- Change the plot type to 'side-by-side bars' if not already set to it
- Create a filter for 'Measure Names' double click on the filter
- Exclude everything but 'Obesity Rate 2012' and 'Obesity Rate 2013'
- Color by 'Measure Names'
- Change the Title to 'Obesity Rate 2012-2013 by State'
- Change the 'Fits' dropdown in the toolbar to 'Fit Width'

Sheet 2 – Packed Bubbles Plot

- **Duplicate your sheet by right clicking on the Sheet tab**
- **Rename your new sheet to ‘Obesity Rate 2012-2013 by State Bubble’**

Sheet 3 – Map

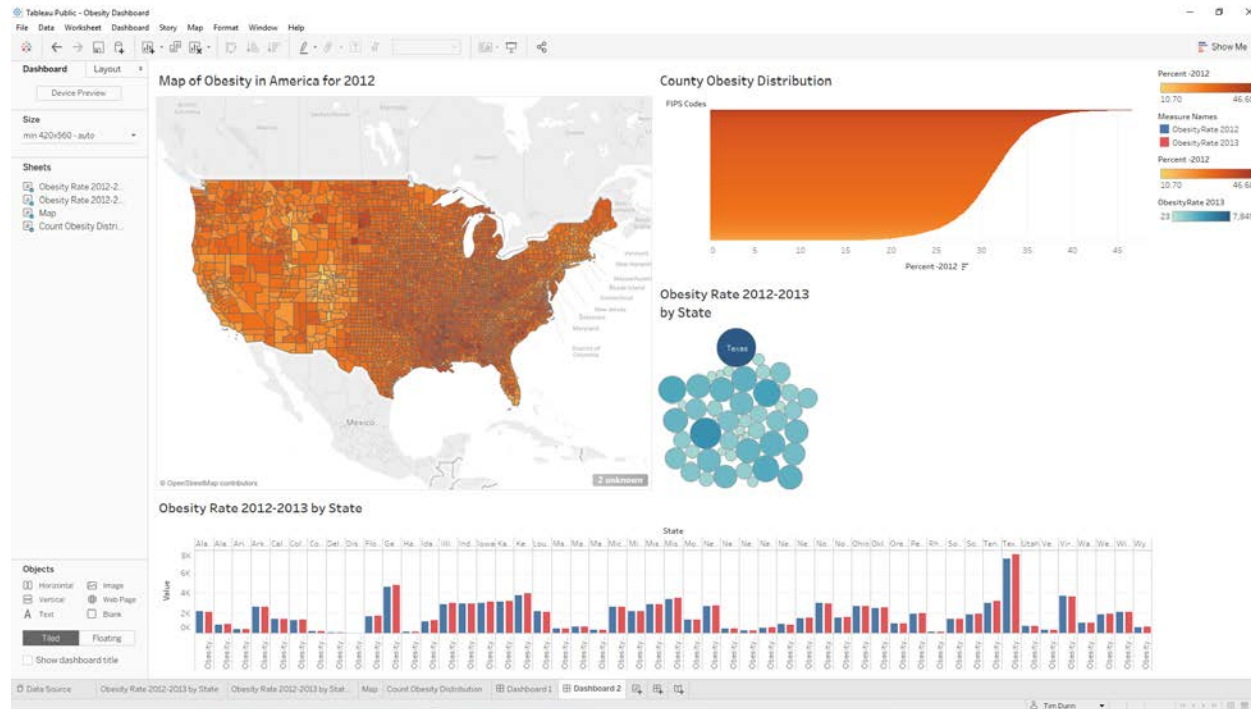

- Create a new Sheet and rename it to 'Map'
- Double click on 'State'
- In the Marks shelf click the drop down btn and select 'Map'
- Right click on Alaska and select 'Exclude'
- Right click on Hawaii and select 'Exclude'
- Drag and drop 'County' onto the map
- Change coloring to 'Precent-2012'
- Double click on Colors, select Edit Colors and change the drop down to 'Orange-Gold'
- Change opacity to 100%
- Change the title to 'Map of Obesity in America for 2012'

Sheet 4 – County Obesity Plot

- **Create a new Sheet and rename it to ‘County Obesity Distribution’**
- **Add ‘FIPS Codes’ to Rows and when asked select ‘Add all members’**
- **Add ‘Percent – 2010’ to Columns**
- **Click the arrow or right click on ‘FIPS Codes’ and select ‘Sort’**
 - **Change order to Descending**
 - **Change Sort by to Field**
 - **Click Apply and OK**
- **Set Color to ‘Percent – 2012’ and change coloring to ‘Orange-Gold’**
- **Change the ‘Fit’ toolbar drop down from ‘Standard’ to ‘Fit Height’**

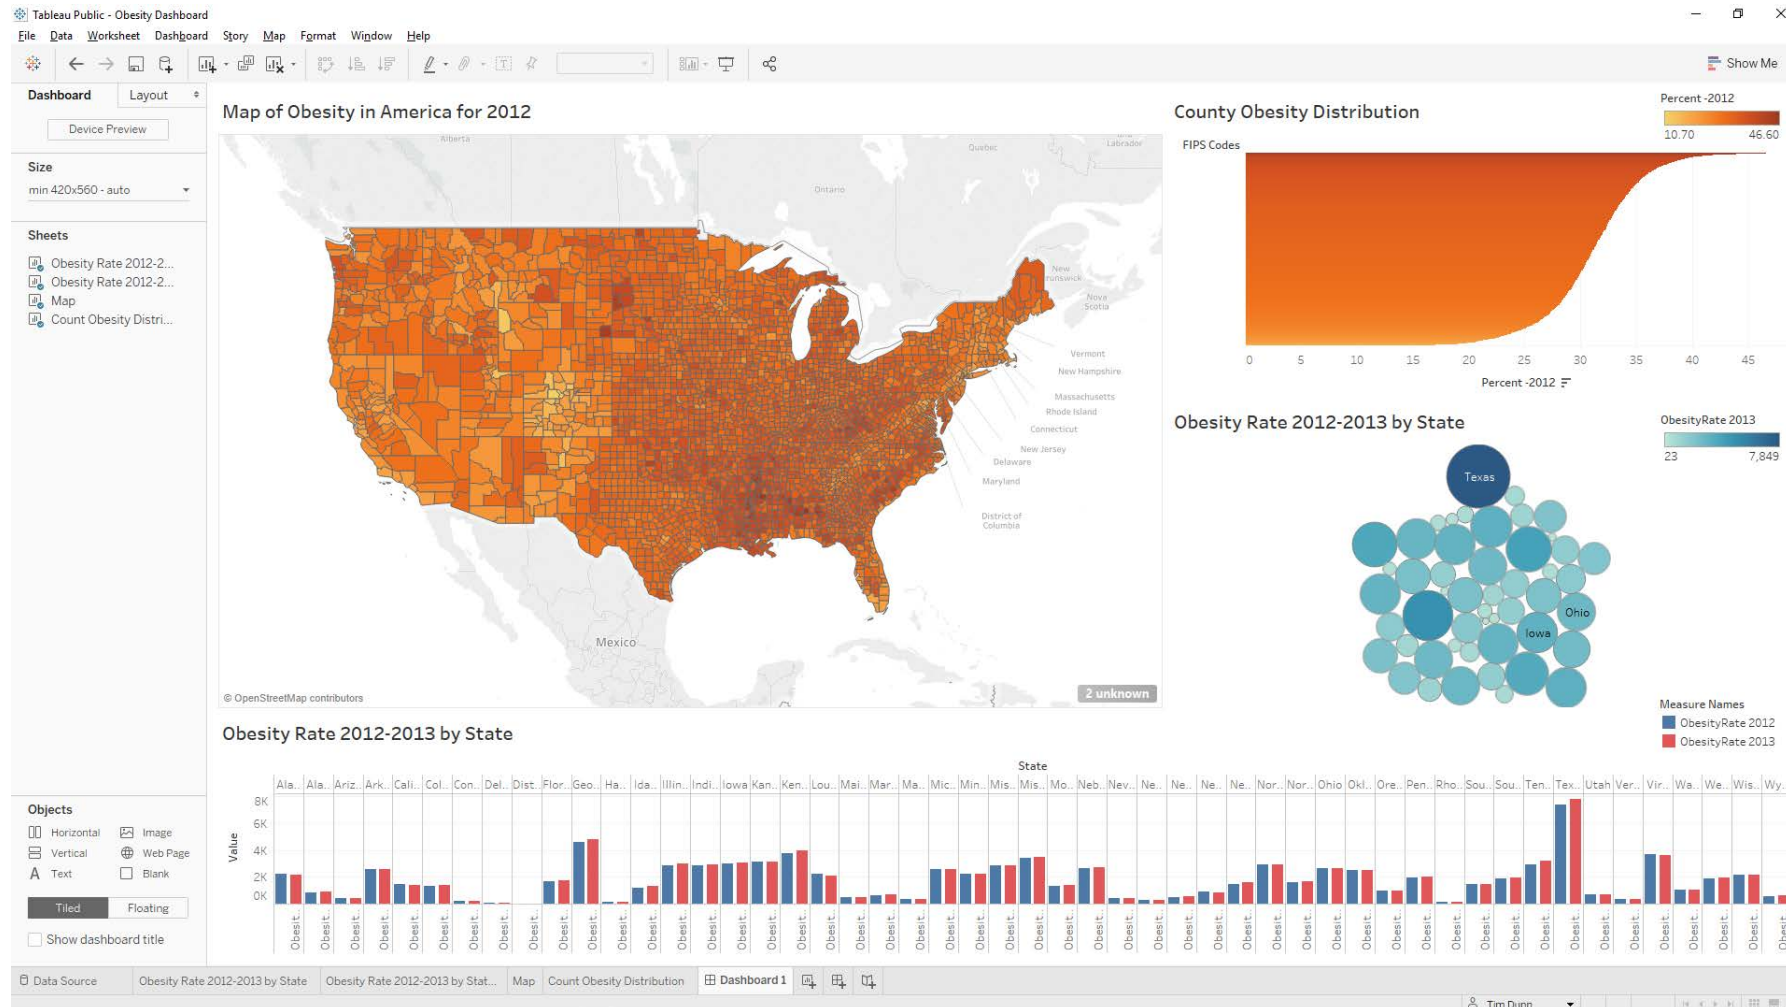

Dash Board – Creating the Dashboard

- Create a new Dashboard
- Click on the Size dropdown and uncheck 'Maximum Size'
- Under 'Sheets' Grab the 'Map' sheet and drag it to the Dashboard
- Likewise grab the other sheets and lay them out to match this layout

Dash Board – Cleaning the Legend layout

- Convert each of the Legends to 'Float' and re-adjust the layout

Dash Board – Adding Interactivity

- Click on the Dashboard menu and select 'Actions' then click on 'Add Action'
- Select 'Highlight'
- Change the Name to 'County'
- Under both Source Sheets and Target Sheets and make sure only 'County Obesity Distribution' and 'Map' are checked.
- Set 'Run Action on' 'Select'
- For Highlighting Fields click on 'Selected Fields' and check 'County' and 'FIPS Codes'
